INNOVATION IN PEST MANAGEMENT

PROTECTION • RESEARCH • SUSTAINABILITY

Delivering innovative pest management solutions that protect people, crops, and New Zealand's native species.

Protecting people,
crops and **native species**.

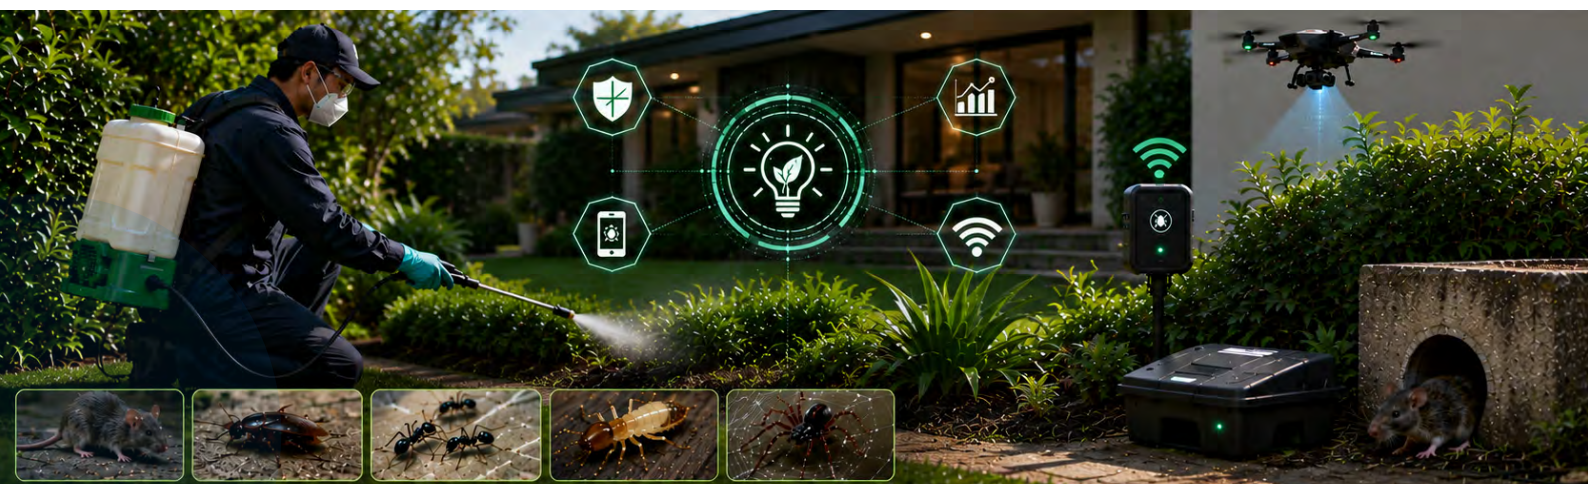

ABOUT KEY INDUSTRIES

Protecting People, Crops and Native Species

For over three decades, Key Industries has supplied New Zealand with trusted crop protection, pest management and environmental solutions. We work alongside growers, pest management professionals and conservation organisations to deliver products that combine proven performance with responsible environmental stewardship.

From advanced agrichemicals and urban pest control to innovative conservation technologies, every solution is selected or developed with one goal in mind – helping customers achieve outstanding results while protecting people, crops and New Zealand's unique natural environment.

NATIVE SPECIES

Trusted by conservation and biosecurity teams to help protect New Zealand's unique ecosystems.

RENOVO

Premium formulations manufactured by Renovo Technologies for lasting quality and reliability.

100% OWNED

Proudly New Zealand owned, delivering solutions developed for local conditions.

OUR PRODUCTS

EcoBird

STORMHAZER BIRD DETERRENT

EcoBird® 4.0 is a professional bird management solution that helps protect people, property and the environment.

Using advanced diffusion technology, such as the pictured Storm Hazer, EcoBird® 4.0 provides effective, long-term bird deterrence in a wide range of commercial and industrial settings.

KEY FEATURES

EFFECTIVE & HUMANE

Deters birds without harm, making EcoBird® 4.0 a responsible choice for modern bird management.

ADVANCED DIFFUSION TECHNOLOGY

Delivers a fine mist that targets birds without harm, creating an unpleasant environment that discourages roosting and nesting.

BUILT TO PERFORM

Industrial-grade formulation for reliable performance in demanding outdoor environments.

ENVIRONMENTALLY CONSIDERATE

Uses approved ingredients and efficient delivery to minimise impact on the environment.

LOGISTICS & DISTRIBUTION

OUR PRODUCTS

EcoBird Diffuser

AUTOMATED BIRD DETERRENT DIFFUSION SYSTEM

Designed for continuous bird management, the EcoBird Diffuser White, automatically disperses EcoBird Bird Repellent as an ultra-fine mist to discourage birds from roosting in commercial and industrial environments. It provides consistent, low-maintenance operation for long-term protection.

KEY FEATURES

AUTOMATED OPERATION

Programmable diffuser provides continuous, unattended bird deterrence.

ULTRA-FINE DIFFUSION

Produces a fine mist that helps create an environment birds avoid.

LOW MAINTENANCE

Designed for reliable day-to-day operation with minimal intervention.

PROVEN PERFORMANCE

Field trials in packhouses, warehouses, cafes and garages showed bird activity reducing over time as birds became conditioned to avoid treated areas.

ECOBIRD® 4.0 BIRD REPELLENT

OUR PRODUCTS

Pied Piper Bait Station

TAMPER-RESISTANT. BUILT TO PROTECT.

The Pied Piper Bait Station is a sturdy, lockable bait station designed to safely and securely contain rodenticides. Built for professional use, it helps protect bait from weather, non-target animals and tampering, ensuring effective rodent control in a wide range of environments.

KEY FEATURES

TAMPER-RESISTANT DESIGN

Lockable construction helps prevent access by children, pets and non-target animals.

WEATHER-RESISTANT

Durable materials provide protection from dust, moisture and harsh conditions.

SECURE BAIT COMPARTMENTS

Internal bait trays keep rodenticides in place and reduces the risk of bait being dragged away.

MULTIPLE ENTRANCE OPTIONS

Designed with entry points to suit rodent behaviour and improve bait acceptance.

BUILT TO LAST

Heavy-duty construction for long-term use in commercial and industrial settings.

**DESIGNED FOR
PROFESSIONAL
PEST CONTROL**

OUR PRODUCTS

Pindone Possum & Rat Control

ERADICATE PESTS. NOT PETS, BIRDS OR NATIVE ANIMALS.

Possums and rats pose a real ecological concern in New Zealand. Pindone is the effective, first-generation bait that has been used very successfully to control rats & possums in New Zealand. As it is a low toxicity cereal based pellet, it does not pose the same secondary poison risk as second generation anticoagulants. It's a safer, more humane option that's less hazardous to non-target species.

KEY FEATURES

USE IN BAIT STATIONS

You don't need to obtain a license for use within a bait station.

SUITABLE IN ANY ENVIRONMENT

can be used around urban and semi urban areas, rural and remote lifestyle blocks. Approved by DOC.

USE ON A CONTINUOUS BASIS

Internal bait trays keep rodenticides in place and reduce the risk of bait being dragged away.

A MORE HUMANE PRODUCT

The bait is dyed green to deter birds and other native wildlife.

VERY COST-EFFECTIVE

Pindone Pellets (and bait stations) are available in 2kg, 10kg and 25kg packs from rural supply stores.

OUR PRODUCTS

Chitinex

INSECT GROWTH REGULATOR

BREAK THE INSECT LIFE CYCLE.

Chitinex is an insect growth regulator that prevents immature insects from developing into breeding adults. It provides long-lasting residual control and is ideal for use as part of an integrated pest management programme.

KEY FEATURES

BREAKS THE INSECT LIFE CYCLE

Stops immature insects from developing into breeding adults.

LONG LASTING RESIDUAL CONTROL

Provides extended protection after application to support ongoing pest management.

SUPPORTS IPM PROGRAMMES

Designed for use in integrated pest management strategies.

PROFESSIONAL FORMULATION

Developed for commercial, industrial and residential environments.

Biff Ant

INSECTICIDE

FIX ANT PROBLEMS EFFECTIVELY FOR UP TO 1 YEAR.

Biff Ant™ has been specially designed in New Zealand for New Zealand conditions and proven effective in a 3 year test programme. It provides long lasting control of a wide range of ants on exterior surfaces.

KEY FEATURES

EFFECTIVE AGAINST ALL ANT SPECIES

Controls all ant species in New Zealand, including Argentine and Darwin ants.

LONG LASTING RESULTS

One application can be effective for months and up to 1 year.

VERSATILE USE

Can be used on all exterior surfaces including trees, lawns, concrete paths and exteriors of buildings.

BUILT TO LAST

Stands up to wash off, UV light, heat, variable pH of surfaces and rain degradation.

COMPATIBLE WITH BAITING PROGRAMMES

Works seamlessly as part of an integrated ant management strategy.

OUR PRODUCTS

SpinOut

ORGANIC INSECTICIDE

SpinOut is a natural pesticide that utilises Spinosad as its active ingredient. Spinosad is a natural substance made by a soil bacterium and is toxic to certain insects.

SpinOut eliminates pests through contact and ingestion activity: exposed larvae stop feeding immediately while taking up to 3 days to die.

KEY FEATURES

NATURAL AND EFFECTIVE

Utilises Spinosad derived from soil bacteria to target pests.

SHORT WITHHOLDING PERIOD

Provides extended protection after application to support ongoing pest management.

HIGH KILL RATE

Larvae stop feeding instantly and die within three days.

HIGHLY CONCENTRATED FORMULA

Delivers a more economical, cost-effective spray programme.

PyGanic

ORGANIC INSECTICIDE

Pyganic is an organically certified insecticide using Pyrethrum sourced from naturally grown Pyrethrum flowers as its active ingredient. Pyganic is made in the U.S.A using a unique process engineered to produce organically compliant pyrethrum.

Mode of Action: Pyganic is a contact insecticide providing rapid knockdown and kill of insect pests within minutes of application.

KEY FEATURES

ORGANICALLY CERTIFIED FORMULA

Uses naturally grown pyrethrum flowers for BioGro approved compliance.

RAPID KNOCKDOWN ACTION

Delivers immediate pest kill within minutes of direct contact.

FLEXIBLE TANK MIXING

Blends cleanly with most insecticides, fungicides, and wetting agents.

ENVIRONMENTALLY COMPLIANT PROCESS

Engineered uniquely in the U.S.A. for strict organic standards.

ZETaPY

NATURAL INSECTICIDE

ZetaPY is based on naturally produced pyrethrum and is a quick acting contact action broad spectrum insecticide. ZetaPY will control sucking and chewing insects that damage fruit, vegetable or ornamentals crops. Rapid breakdown of the product following application means there is little or no residue left.

ZetaPY can also be used as a thermal fogging agent for industrial and urban pest control to exterminate flying and crawling insects.

KEY FEATURES

ULTRA RAPID KNOCKDOWN

Exterminates target crawling and flying pests within minutes of contact.

ZERO RESIDUE RISK

Breaks down rapidly following application to protect export harvest windows.

VERSATILE APPLICATION METHODS

Applies seamlessly as a crop spray or an industrial thermal fogger.

HIGHLY FLEXIBLE TIMING

Features a convenient one-day withholding period on most commercial crops.

OUR PRODUCTS

SprayFast

NON-IONIC SURFACTANT

SprayFast is a premium non-ionic surfactant and wetting agent designed to enhance the performance of agricultural and agricultural sprays.

It improves coverage, spread and penetration of spray solutions, delivering better results with a wide range of insecticides, fungicides, herbicides and foliar fertilisers.

KEY FEATURES

ENHANCED SPRAY PERFORMANCE

Improves wetting, spreading and penetration of spray solutions for more effective results.

SUITABLE FOR WIDE USE

Compatible with most insecticides, fungicides, herbicides, growth regulators and foliar fertilisers.

RAINPROOFER & STICKER

Helps reduce wash-off from rain and improves adhesion of sprays to target surfaces.

IMPROVES COVERAGE

Reduces surface tension of water to ensure uniform coverage and better spray efficiency.

FOLIAR FERTILISERS

PRODUCT INFORMATION

- Active Ingredient: 333 g/L Di-1 p-menthene
- Formation: Non-ionic Surfactant
- Function: Surfactant, Sticker, Rainproofers, Wetting Agent
- Use Rate: As per chemical label recommendations
- Compatibility: Compatible with most insecticides, fungicides, herbicides, growth regulators and foliar fertilisers
- Pack Size: 1 Litre

OUR PRODUCTS

Dräger X-PLORE® 8500

PREMIUM POWERED AIR PURIFYING RESPIRATOR

The Dräger X-plore® 8500 is a premium Powered Air Purifying Respirator (PAPR) system designed to provide reliable respiratory protection with maximum comfort and ease of use.

With intelligent electronics, high protection performance and robust design, it is the ideal choice for demanding industrial environments.

KEY FEATURES

SUPERIOR PROTECTION

High protection factor for particles, dusts and mists with TH3 filtration efficiency.

MAXIMUM COMFORT

Lightweight, ergonomic design with even air distribution for all-day comfort.

LONG BATTERY LIFE

Up to 8 hours of continuous operation on a single charge for full shift performance.

INTELLIGENT OPERATION

Easy one-button operation with visual, audible and vibrating alarms for safety and convenience.

ROBUST & RELIABLE

Built to perform in tough environments with IP65/67 rated protection against dust and water.

IDEAL FOR

**ALL SPRAYING
APPLICATIONS**

FOGGING

CROP SPRAYING

FUMIGATION

RODENT CLEANUPS

SPECIFICATIONS

- Protection Factor: TH3
- Airflow: 170 / 200 / 230 l/min (3 levels)
- Battery Runtime: Up to 8 hours
- Charging Time: Approx. 4 hours
- Ingress Protection: IP65/67
- Operating Temperature: -10°C to +50°C
- Set Includes: Blower Unit, Premium Hood (L/XL)
Battery, Charger, Belt, Breathing Hose
